

## **Restek UK Ltd Awarded Contract for Remediation of Doncaster's Historic Grade II Listed Headstocks**

Restek UK Ltd is proud to announce that it has been awarded the contract to carry out essential safety work on the two Grade II Listed Headstocks for City of Doncaster Council . This project is UK Government funded through the Stainforth Town Deal fund, and overseen by the Town Deal Board.

These iconic structures, which stand as a testament to the region's industrial heritage, will undergo extensive repairs to ensure their longevity for future generations.

The project, set to commence in June 2025, is expected to span approximately two years. During this time, Restek UK Ltd will work closely with the council and conservation specialists to address the structural and environmental concerns of the headstocks while preserving their historical significance. The remediation work will focus on ensuring the safety of these architectural landmarks, which have been a defining feature of Stainforths skyline for decades.

Restek's expertise in ground treatment and remediation, particularly in projects involving heritage structures, makes them the perfect partner for this important restoration. The company is committed to maintaining the balance between modern safety standards and the preservation of the site's cultural value.

The remediation of the Grade II listed headstocks will not only safeguard the future of these historic structures but also contribute to the ongoing regeneration and preservation efforts in Doncaster, ensuring these iconic symbols of industrial history remain a part of the city's landscape for years to come.

Stay tuned for updates as the project progresses and Restek UK Ltd begins its work on this significant scheme in the summer of 2025.
